Chennai

SUMMARY

I am a data engineering expert with experience in the design and implementation of data cleaning and preprocessing, and handling both structured and unstructured data. I have direct experience in data analytics, full stack development, and data handling, which makes me capable of handling robust data systems, enhancing data quality, and facilitating effective data solutions for various requirements.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science

Panimalar Engineering College

09/2023 - 05/2027

Chennai

HSC

Government Higher Secondary School

04/2023 - 04/2023

Nagercoil

SSLC

Bapuji Memorial Higher Secondary School

05/2020 - 05/2020

Nagercoil

INTERNSHIP

Full Stack Developer Internship

Main Flow Services and Technologies Pvt. Ltd

10/2025 - 11/2025

Online

- I worked as a Full Stack Developer Intern, where I helped design and maintain responsive web applications. I worked on front-end interfaces, back-end logic, RESTful API integration, and database tasks.

Data Analytics Internship

YBI FOUNDATION

12/2024 - 01/2025

Online

- As a Data Analytics intern, I was responsible for collecting, processing, and analyzing data, created dashboards and reports, and delivered insights to support business decisions.

Data Science and AI & ML Internship

YBI FOUNDATION

06/2024 - 07/2024

Online

- During my Data Science and AI/ML internship, I improved and optimized machine learning models. I performed data preprocessing and feature engineering, increasing model accuracy by 15-20%.

KEY ACHIEVEMENTS

Publications

I am the author of an IEEE paper titled "Energy Conservation Strategies for Small Islands Using Smart Grid Technology," which I presented at an academic conference.

PROJECTS

Employee Performance Measure

Prediction

01/2025 - 04/2025

- I have created predictive models to evaluate and forecast employee performance outcomes.

Customer Churn Prediction

05/2024 - 08/2024

- Customer churn prediction is a supervised machine learning technique based on customer data to predict the probability of customer churn.
